

Make The Walls Sing

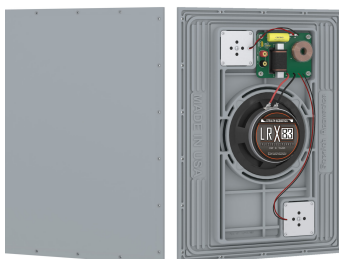

Home Theater  
Sound and Visual Specialist

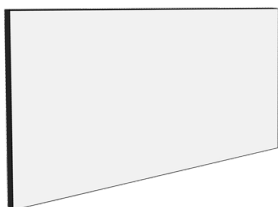

WE MAKE SPEAKERS DISAPPEAR in this home theater !

# Home Theater & Invisible Speaker

**STEALTH**  
ACOUSTICS

**DT**

**JVC**

Super-clean and luxury home theater with the audiophile sound & high-end visual quality

We are specialized in “*Invisible Speaker*” solutions from Stealth Acoustics, USA, that you could 100% build into your walls and ceiling. You can paint, wall-paper, laminate over the front side of the speakers so the speakers become truly invisible while providing superb sound quality like when you are in the cinema !

Together with the Stealth Acoustics invisible speakers, we offer the screen from *Display Technologies* (DT) of UK which is a high performance and design screen that comes with acoustically transparent technology. We also offer *JVC Projectors* which generate the visual quality like when you are in the theater. For those who prefers large screen TV, we could also offer premium ranges of Samsung QLED TVs.
