Invisible Foreground Music Speaker
Whole-house Audio System

Super-clean and luxury home delicately filled with the audiophile-quality sound & music system

We are specialized in “*Invisible Speaker*” solutions from Stealth Acoustics, USA, that you could 100% build into your ceiling (and walls). You can paint, wall-paper, laminate over the front side of the speakers so the speakers become truly invisible after installation while providing superb sound quality and make your home a musical place without disturbing the home interior design.

Together with the high quality audio equipments including amplifier and music server, we could offer one of the best foreground music & whole-house audio systems you could find in the market.
